

CALC4XL

Product Cost Calculation Modules

- Define new CALC4XL benchmark database as default database
- Update the CALC4XL Benchmark Database with your own data

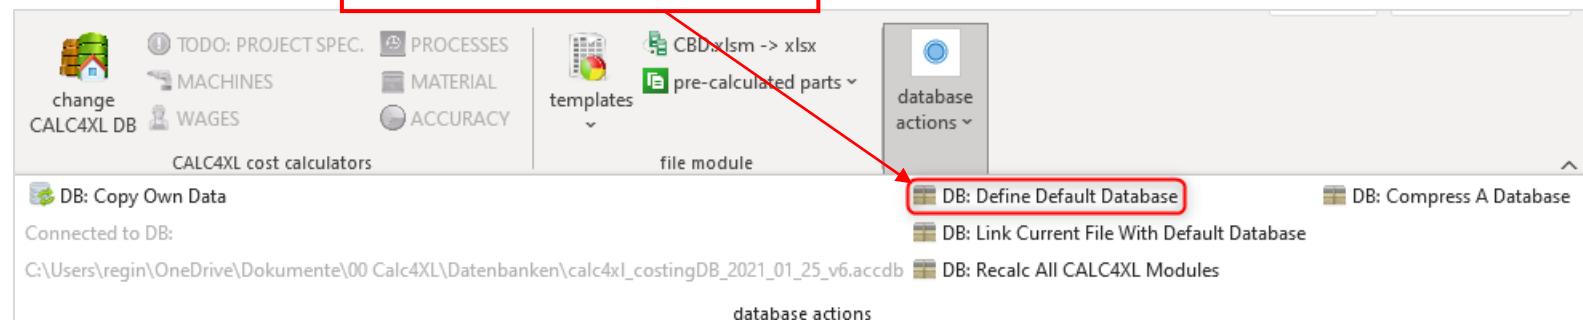

New CALC4XL Benchmark Database

New CALC4XL benchmark databases include

- Updated country data (e.g. footprint costs, electricity costs, imputed interest, ...)
- Updated overhead rates
- Updated material data
- Updated wages
- New machines
- New & updated CALC4XL Templates

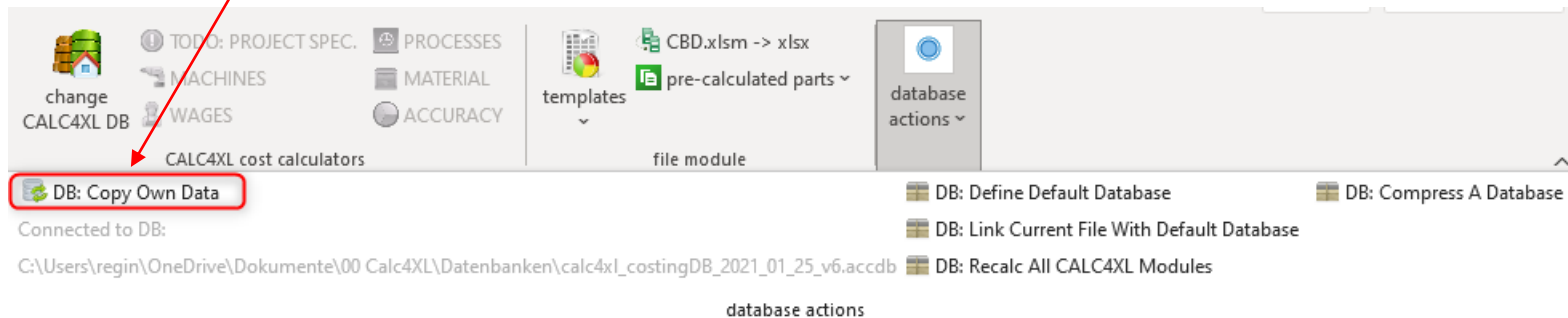

If you are already using a CALC4XL benchmark database, you should define the newly provided CALC4XL benchmark database as the **new default database**.

Update the CALC4XL Benchmark database

If you already use a CALC4XL benchmark database in which you have created your own data (machines, materials, file templates, ...), you can transfer your own data to the new CALC4XL benchmark database using the DB exchange module:

- Click in the CALC4XL Excel menu under database actions on "DB: Copy own data"

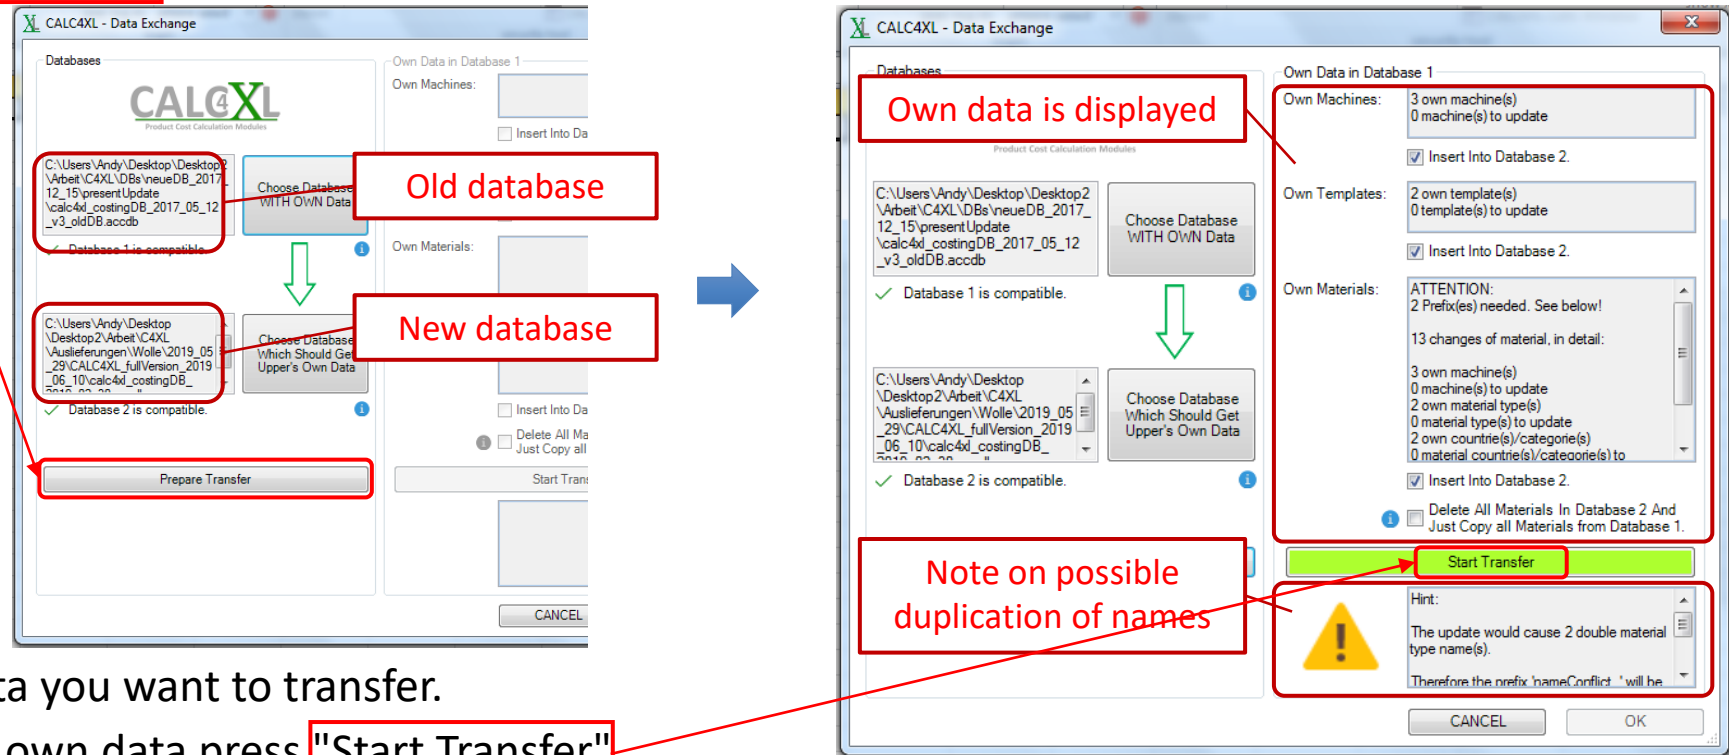

- CALC4XL opens the database exchange module in a popup window.
- Tip:**
If you are not sure whether your previous CALC4XL benchmark database contains your own data, you can check this in the DB Exchange Module.

Continue on the next page

Update the CALC4XL Benchmark database

- Perform the following actions in the database exchange module:
 - Select your database with your own data and the new CALC4XL benchmark database
 - Press "Prepare Transfer".

- Select which data you want to transfer.
- To transfer your own data press "Start Transfer".
- Wait until a green hook ✓ confirms the transmission. Done.

A person in a dark blue suit and tie is holding a set of large, 3D block letters. The letters spell out 'CALC4XL'. The 'CALC' part is silver, the '4' is a smaller silver digit, and the 'XL' part is bright green. The person's hand is visible on the left, holding the letters. The background is a plain, light-colored wall.

Product Cost Calculation Modules

Many thanks!

On the one hand you can only see the costs and on the other hand you keep turning a blind eye - the best guarantor for bilateral poor eyesight.
